

How to calculate your own handicap:

Remember I said we have the best Handicap System anywhere.

The system takes the four best of your last five scores to calculate your handicap.

Example: Mike Teague = Exactly a 6 Handicap after this past tournament on 16 April.

Date:	Course	Score	minus	Par for Course
16 April	Regional	77		72 = 5
29 Aug	Regional	81		72 = 9
15 Aug	Earlywine N.	78		72 = 6
25 Jul	Lincoln West	76		<u>71 = 5</u>

Add difference 25 and divide by 4 rounds

$$25/4 = 6.25$$

Then multiply by the differential of .96

$$6.25 \times .96 = 6$$

When you click on the Current Handicaps link on our home page, use your four scores that have asterisks by them. These are the four scores used by the system to calculate your current handicap. *Remember to use the par for the courses you played. Some courses are par 72, some are 71 and some are 70.
